

GreenScan™

Comprehensive and cost-effective analyses for Green Building Certification Credits

A GreenScan™ analysis by Prism Analytical Technologies is designed to support IAQ certification in Green Buildings. It provides a low-cost survey of LEED® (Leadership in Energy and Environmental Design) IAQ VOCs. Regardless of which version of LEED® you are using, Prism has the solution for you. As a bonus, a full Comp-Air Analysis can be performed without collecting another sample. This additional data can help highlight the materials with the largest impact on indoor environmental quality.

GreenScan™ Analysis Options

LEED® v3.2 - IAQ Before Occupancy

- GreenScan™ Basic analysis for TVOC and 4-PCH
- Formaldehyde

LEED® v4 - IAQ Assessment

- GreenScan™ Select analysis for complete list of Target VOCs
- Optional full VOC CompAir™ analysis
- Formaldehyde

LEED® - IEQ Pilot Credit 68

- GreenScan™ Select analysis for complete list of Target VOCs
- Top 10 Compound Analysis

Advantages

- ▼ Low-cost LEED® v3.2 (2009) Env. Quality credit analysis
- ▼ Complete LEED® v4 IAQ Assessment VOCs in one easy to read report
- ▼ Reporting available for LEED® IEQ Pilot Credit 68
- ▼ One sample covers up to 2,000 sq. ft./zone/floor (subdivided) or 10,000 sq. ft./zone/floor (open)
- ▼ Optional full VOC CompAir™ Analysis available
- ▼ Trained chemists available to help with interpretation of results — there's no need to be an expert
- ▼ Each sampling tube is glass-encapsulated to ensure cleanliness
 - Shelf life 1 year; can keep on hand for quick assessment
 - Same tube applies to nearly all VOC analyses with Prism
